

The garden awaits

There are some good things to say about the cool weather. We've been granted more time to get out and clean-up, finish renewal pruning, trim back the perennials and clean out the pond. Heck, if your garden is dry and tilled you can get in the potatoes, radish and other cool season crops.

Many of you are anxiously awaiting the arrival of trees and shrubs. We're working on it steadily and hope to be ready by the end of next week with some stock. Look for a full lot by the end of the first week of May as we will continue to add stock until then.

Stop in now for garden seeds, seed potatoes and onion sets. By end of next week or so we should have onion plants, bare root strawberries and asparagus. Give us a call before you travel too far for these goodies in case they are not in stock yet.

More Seminars

We had a great turnout for our seminars last Saturday. Come on in this week and learn something new about the garden.

Call us (507-388-4877 or 800-536-0758) to save a seat at one (or each) of these seminars we have planned for Saturday, *April 12*

9:30 am & 1 pm - Care and Feeding of Water Gardens with Mia Keske of Mars Fish Care the makers of Pond Care products We offer this popular class twice! Mia's got the answers you need to maintain a pond or pondless waterfall in your landscape. If you've dreamed of adding a water garden, this is your chance to learn the basics of water, fish and plant care. Mia will also have tips on operating existing water gardens as well as solutions to challenges.

11 am - 20 Sustainable Tips with Liza Domeier One of Drummers experienced gardeners, Liza offers these easy tips to help you make the best of your garden. If you're growing your own food, flowers or trees check this out. She'll explain pest and weed control without the use of chemicals as well as soil enriching techniques that will also help conserve water. Get familiar with our earth friendly and organic products.

3 pm - Top 10 Crops for Kids with Sarah Malchow Get your kids hooked on gardening with easy-to-grow plants and fun projects they'll remember for a lifetime. Plus, show them food can come from their own back yard.
